Enforcement Handheld - Pay Station Interface

Save Time

Customers with both Digital Payment's Intella-Pay Payment Stations and the ParkTrak Pro Enforcement System can now have stall information transfer directly from the payment station to the handheld via an IR link. The transfer process is very easy to use and doesn't require technical knowledge.

Direct download allows for greatly expedited checking times, giving your employees the ability to cover a greater area or attend to other duties.

Easier For Your Customer...

Now your customers can pay their ParkTrak issued ticket directly at the Intella-Pay Payment Station. No more writing a check or finding a stamp, simply pay at the box with cash or credit card.

More Money for You...

And because it is easier for your customer, you will see increased payment rates... faster.
